

Summary information for 94.185.90.68/32

Note: Times shown are for the latest entry only!
Found 2 network entries and 0 host/domain entries.

Problem Entries, (listings will cause email problems.)

Spam entries [00:50:43:08 Jun 2010 GMT-04]

Usage classification (only important if you run your own mailserver.)

Note: Active "exDUHL" entries mean that the IP/Network has been unblocked for some or all IPs from the DUHL.

Problem hostnames/domains (could cause email problems.)

Note: These entries are for URLs or email domains, the IPs that may show up as 'spamvertised' only indicate where the URL/Host was seen being sent from. Listings for IPs that are 'spamvertised' will not usually cause blocking problems unless the email contains the IP address as a URL.

Note: For a more detailed view you have to be registered and logged in.

Current Listings (active)

Historical Listings (inactive)

Current Listing with an active exception

Current Listing however, listings of these types can help mail delivery rather than cause blocking.
